

WHAT MAKES ME POPULAR

BOSPHORUS

Contemporary designs in modernistic hues: these traits are what define our Bosphorus Collection. Texturization reigns supreme as the distinct characteristic this collection upholds; a flat woven field is embellished with cut pile, in wool or bamboo silk, to create a dimensional design. This collection is hand-knotted using a combination of soft wool and bamboo silk. Coming in a range of standard sizes and customizable silk, and is available in-stock in standard sizes, as well as custom sizes upon request.

Creative Touch takes pride in cultivating a boutique experience for our customers complete with unsurpassed attention to detail, and an intimate involvement in the custom design and construction process. Rugs are works of art meant to transcend time and trends. We aspire to create and supply homes with livable art that can be passed down through generations.
