FOR IMMEDIATE RELEASE

Streamline Art Kicks Off Their 40th Anniversary Celebration at High Point Market with Morning Mimosa's and Unprecedented Releases in Hand Embellished Art

Mississauga, Ontario – October 2025

Streamline Art, a market leader in wall décor offering innovative color and style trends, has been manufacturing and importing quality fine art in every style, size and price point for forty years. From their annually published color trends each January to their commitment to best-in-class design & quality, they always deliver the highest standards regarding product and customer satisfaction while providing a price to value proposition that is second to none in the industry.

Streamline Art's 30,000 square foot manufacturing facility in Toronto, ON equipped with state-of-the-art printers, cutting-edge framing technology and highly skilled designers and staff to ensure top-notch production. They collaborate with best-in-class factories for their hand embellished products, demanding the highest standards in quality with exceptional turn times. They partner with publishers, licensees, and amazing artists to develop all their products, which ship from warehouses in Buffalo, NY and Toronto, ON.

"In this day and age celebrating a 40th anniversary is a testament to the quality and service Streamline Art has provided to our retail partners," said Mark Wiltshire, President of Streamline Art. "For the past 10 years we have enjoyed exceptional growth in North America, quickly becoming the go-to wall art supplier based on our curated collections coupled with unprecedented price/value/quality."

An impressive collection of 250 new releases focused on additions to their hand embellished art assortment will be introduced by Streamline Art at the October 2025 High Point Market. This introduction is significantly larger than they would typically introduce in High Point. You will see clear inspiration taken from nature with rich tones focused on the themes of landscape, coastal, abstract and animal. Their hand embellished art fills a void in the market based on how they add the hand painted brush strokes for a three-dimensional effect, metal to a barn roof, grass or stones to a landscape etc. for an amazing final product effect. The entire collection aims to be 100% in-stock with a 5–7-day turnaround.

"These new releases for hand embellished art are nature inspired and deeply rooted in earth tones and electric pastels with an ethereal feel. Plus, we've added more oversized pieces, particularly for furniture stores, given the success of our Spring 2025 market introductions," said Jenny DiVizio, Director of Product Development and Merchandising for Streamline Art.

Streamline Art's collections are refreshed every ninety days, keeping them consistently on trend. They stand apart from the competition by developing collections, themes and style trends around a "color way" (color trend) that tells a story. Their annual color trends, based on information gathered from companies such as Pantone and Sherwin Williams, lead to eight main color trend designations unique to Streamline Art.

Their current collections are centered around 11 plus categories or themes and available in multiple size and price options, giving retailers and designers the ability to select from a vast array of possibilities to fit their desired esthetic. Streamline Art also offers Print on Demand (POD) stretched canvas art with over 2,000 images from which a customer can choose. More to come on their POD program with new releases for the January 2026 markets.

To kick off their 40th anniversary, Streamline Art will be serving Mimosa's from 8-10 am Saturday-Tuesday, October 25-28, in our showroom in IHFC C-503. Come join in the "sip and shop" celebration and be the first to preview these amazing new introductions!
