FOR IMMEDIATE RELEASE

Memoire Design™ Introduces New Outdoor Dining Styles in Weather Resistant Resin

Atlanta, Georgia — Memoire Design™ announces the launch of four new outdoor styles, expanding the brand's outdoor dining offering with pieces designed to bring the comfort and refinement of indoor living to open air spaces. All new styles are available in Memoire Design's signature Natural and Dark Walnut finishes.

Designed with durability, versatility, and timeless appeal in mind, the collection reflects Memoire Design's commitment to thoughtful craftsmanship and relaxed sophistication. Each piece is intended to seamlessly transition between indoor inspired design and outdoor performance, making them ideal for garden settings, coastal homes, and outdoor entertaining.

The new introductions include the Outdoor Louis Trellis Dining Chair, our most popular dining chair in a classic silhouette that balances classic detailing with an open, airy feel. The Outdoor Braided Dining Table anchors dining spaces with sculptural texture and generous proportions, while the Outdoor Round Dining Table offers a more intimate option for gathering. Completing the assortment is the Outdoor Planter with Liner, designed to integrate greenery naturally into outdoor living environments.

Crafted to withstand outdoor conditions while maintaining the warmth and visual depth that define the Memoire Design™ aesthetic, these pieces complement a range of styles, from coastal and traditional to transitional outdoor spaces.

The collection is now available through Memoire Design™.
