

FOR IMMEDIATE RELEASE

Kingsley Bate Introduces Biscayne and Cortona Collections for 2026

New cushion-less seating and architectural teak dining tables lead the Spring 2026 lineup.

MANASSAS, VA, JANUARY 28th, 2026: Kingsley Bate is introducing two new collections for Spring 2026: Biscayne, a modern upholstered-mesh collection designed for everyday outdoor living, and Cortona, a pair of architectural teak dining tables that bring refined presence to outdoor entertaining spaces.

Biscayne Collection

Biscayne captures the relaxed elegance of its namesake bay with mesh sling upholstery over quick-drying reticulated foam, delivering lasting comfort without the need for cushions. The collection includes a dining chair, sofa, swivel rocker, lounge chair, ottoman, chaise, and occasional tables. Stocked in Beige sling with Beach wicker, with additional color options available by special order.

Cortona Collection

The Cortona dining table features an expansive top crafted from wide Grade A teak planks, highlighting the wood's natural grain and tonal variation. Sculptural slab legs with subtle vertical detailing balance visual weight with sophisticated restraint. Available in 96" and 108" sizes, seating 6-8 and 8-10, respectively.

Montauk: New Brushed Finish

The Montauk collection will now be stocked in a new Brushed finish, an unpainted treatment that subtly enhances the distressed teak's natural texture and depth. The collection includes a sofa, lounge chair, sectional seating, and occasional tables.

Expanded Finish Options

Kingsley Bate is also introducing two new wicker options available by special order: Weathered Cord on the Barcelona collection, and Beach, available on 8 collections and our woven cushion boxes. A new Beige sling option will be offered on Milano and Quogue.

Availability

All new products will be available beginning Spring 2026 through authorized Kingsley Bate retailers and trade professionals. For dealer locations, visit [kingsleybate.com](https://www.kingsleybate.com) or call 703.361.7000.
