

AMITY HOME BRINGS LAYERED LIVING TO THE FOREFRONT

Amity Home presents a study in layered living—where textiles move beyond the bed to shape the character of the entire space. In this composition, a softly scaled floral drapery sets the tone, introducing movement and pattern that frame the room with quiet confidence.

From there, the story unfolds through contrast. Tailored upholstery provides a clean foundation, while an interplay of woven textures, structured stripes, and classic plaids builds dimension across the seating. Warm, grounded tones meet cooler hues, creating a balance that feels both considered and effortless—refined without being rigid.

Each element stands on its own, yet gains depth in combination. A pillow becomes more than an accent when paired against a different texture; a throw shifts from functional to defining when layered with intention. This is where Amity Home's a la carte approach comes to life—not as a collection of separate pieces, but as a cohesive material language that can be edited, expanded, or softened depending on the space.

Designed to move fluidly across categories—from curtains to rugs to accents—these textiles offer designers the freedom to shape environments that feel collected over time. The result is a space that invites interaction, balances pattern with restraint, and reflects a point of view that is both personal and enduring.

With a focus on natural materials, thoughtful texture, and versatile design, Amity Home continues to offer the tools to build rooms that live as beautifully as they look.
