

Thayer Coggin to Launch TC Visualizer Ahead of Fall High Point Furniture Market

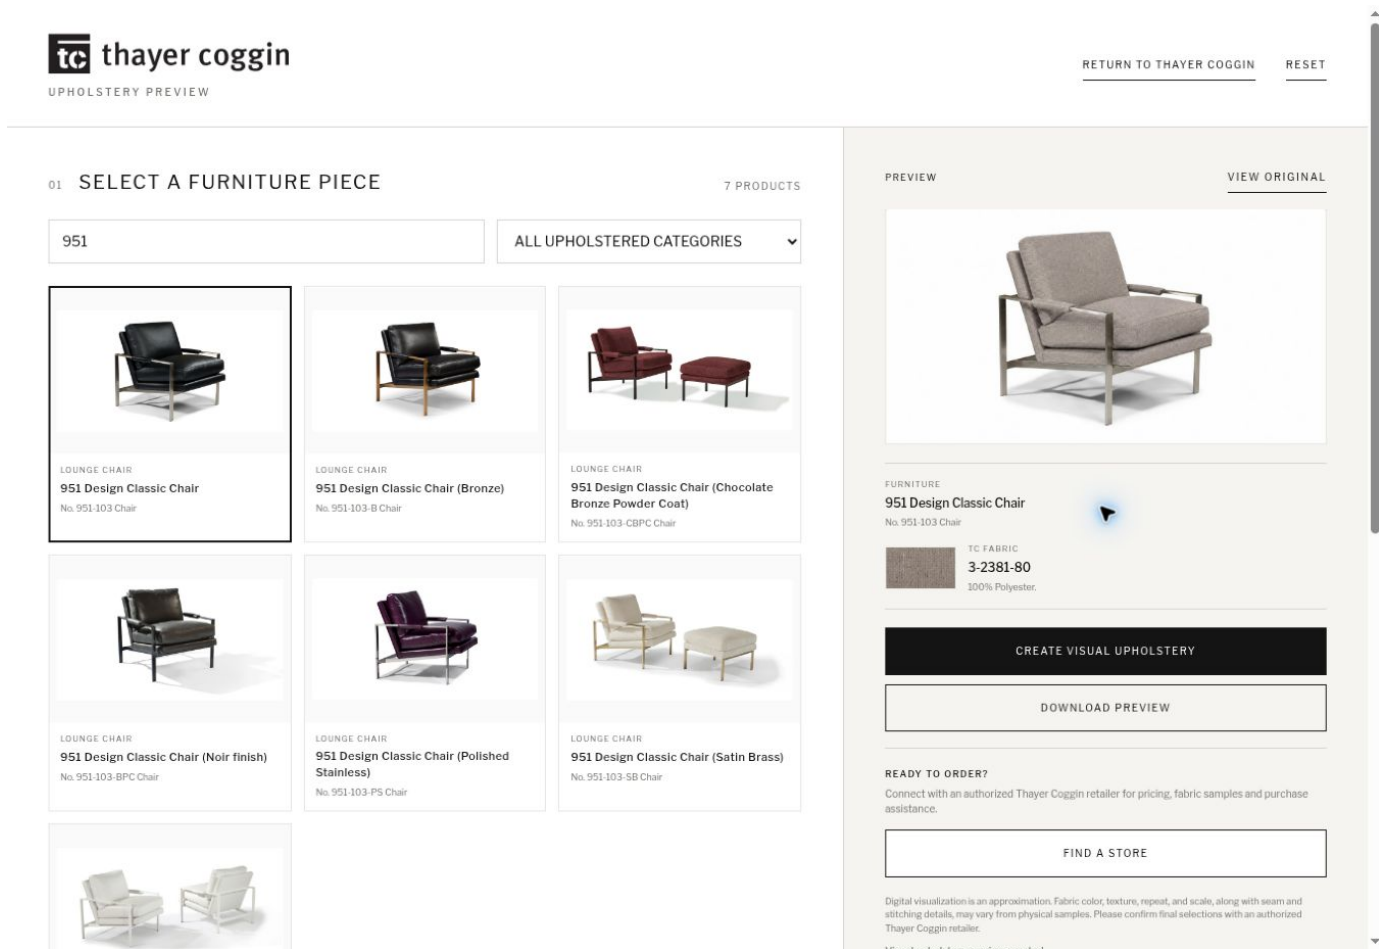

HIGH POINT, N.C., October 2026. Thayer Coggin will introduce the TC Visualizer on its website ahead of the Fall 2026 High Point Furniture Market (HPMKT), which opens October 17. The new online tool gives interior designers, retailers and customers a way to explore upholstery choices on selected Thayer Coggin designs.

Visitors can choose a furniture piece, select a TC fabric or leather, and create a digital upholstery preview. Search and filtering tools help narrow the options, while downloadable previews make it easy to share ideas with clients or an authorized Thayer Coggin retailer.

Featuring designs such as the iconic 951 lounge chair, the TC Visualizer brings a fresh perspective to the possibilities of upholstered furniture. It offers a useful starting point for design conversations before a showroom visit or fabric selection.

Digital previews are approximate. Final color, texture, scale and tailoring details should be confirmed with physical samples and an authorized Thayer Coggin retailer.

The TC Visualizer will be available at thayercoggin.com/visualizer.
