

A NEW SEASON IN LIGHT

Uyuni Lighting introduces its' latest collection with new colors, finishes, and decorative forms designed to bring warmth and character to contemporary interiors.

The collection expands Uyuni's approach to candlelight through refined surface treatments, new material expressions, and a calm seasonal palette. From decorative LED Tapers and muted greens to larger scale Glass Candles and metallic Tealights, it offers new ways to layer light throughout the home while retaining the Scandinavian simplicity and lifelike glow associated with Uyuni.

Decorative Tapers

This season, Uyuni Lighting gives the Classic Taper a more decorative expression through new striped finishes, Pearl Ivory, and Sage Green.

The Striped Taper Candles, available in Pearl White and Gold Finish, introduce pattern and subtle texture, while Pearl Ivory adds a soft reflective surface that catches and enhances the candle's warm glow. Sage Green brings a calm, natural tone to the collection and pairs easily with materials such as wood, stone, ceramics, and glass.

Together, the new finishes offer a versatile way to bring color, texture, and rhythm to dining tables, consoles, and layered interior settings.

Glass Candles

The Glass Candle Collection expands for the season with new Grey Glass Candles in two larger sizes.

Encased in smooth, sandblasted glass, the candles soften and diffuse the Signature Flicker™ glow, creating warm ambient light while adding material depth to the interior. Their smoky neutral finish works easily across a wide range of palettes and makes them well suited to coffee tables, shelving, side tables, and larger decorative arrangements.

Melted Maxi Tealights

The new Melted Maxi Tealights reinterpret the familiar tealight in a larger, more decorative format.

Available in Silver and Brass, their metallic finish adds a subtle reflective element to tables, trays, shelving, and styled displays. Their compact scale and clean form make them easy to use individually or in groups.

Seasonal Sculptures in Light

The collection also includes sculptural seasonal designs such as the Christmas Tree Candle Collection, Santa Claus Candle, and Angel Candle.

These pieces bring shape, character, and warm illumination to seasonal interiors while maintaining the refined visual language of Uyuni Lighting.

Designed for the Interior

Across the collection, Uyuni Lighting continues to explore candlelight as part of the wider interior scheme. Through color, pattern, glass, metallic finishes, and sculptural form, the collection offers new ways to create warm, layered environments that feel considered and contemporary.
