CITY COLLECTION

Forget cold, minimalist interiors. Today's contemporary style is all about spaces that are attractive, welcoming and comfortable. With **CITY**, the **contemporary collection of HURTADOS's EVOLUTION line**, you can create sensational interiors that **mix soft, balanced lines with refined details**. Just watch, imagine and start creating!

Made of the **finest veneers**, the **CITY collection** puts **a lot of emphasis on line and form to provide spaces with energy and elegance** at the same time. It includes a **full range of versatile home furnishings** that can be used to design different ambiances, from classic interiors to the most contemporary.

As in all the EVOLUTION collections, the visual impact of **CITY** is improved by a **subtle interplay of geometric shapes, manufacturing skills, top quality materials and fine details**.

Wood plays a big role with pieces that can be veneered in natural **walnut, maple, rosewood** and **oak**. The grain of wood is always respected and enhanced by **skilled matching effects**.

Great personalization is also ensured by a **choice of lacquer finishes, different sheen levels (matte, satin and high-gloss)** and the use of more **contemporary materials**, such as glass and steel detail.

In **dining spaces**, the visual impact is given by the skillful play of geometric lines that design the dining and occasional tables of the collection.

Clean lines, chromed metal bases and **glass tops** lend a **sculptured essence** to pieces while accentuating the contemporary mood.

A chromed metal surrounding frame can be added to **headboards** for an extra sophisticated touch in **bedrooms**. Beds can also be chosen with a luxurious **deep buttoned headboard** that maximizes comfort while turning beds into the focal point.

For a fresher look, try the high-gloss white lacquer finish in combination with chromed details and bases.

The flexible **modular system** allows **endless living room compositions**, based on one's needs and taste. The alternation of open and closed wall units, complemented with low base units of different width, modernize the scheme and add a dramatic look.

A choice of **chairs, arm chairs** and **sofas**, all of them upholstered in the trendiest fabrics, participate in creating an environment of great impact.

Design options for bedside tables, chest-of-drawers, sideboards and bar cabinets include also the possibility to choose between a **compact wooden base** and a **metal base with legs**, which is the best option to lend a lighter visual effect to the scheme.

To maximize functionality, an **optional LED interior lighting systems** (CE certified and conform to EU directives EN60598) is also offered. All transformers have thermal protection to turn the lights off automatically in the event of overheating.

Founded in Valencia, Spain, in **1940**, **HURTADO** enjoys a renowned international reputation for its excellent furniture collection both in **classic and contemporary style**. The brand can be found in more than **50 countries** and in the US market with a **showroom of more than 1.700 sqm / 18000 sqf located in High Point (North Carolina)**.
