## **About Jamie Young Company:**

In 1997 artists Jamie Young Jeter and David Jeter took a day trip to Mexico that changed not only their lives but the expectations of the design world. At a roadside stand, their discerning eyes were caught by a selection of rustic, handcrafted flower pots. Realizing that they would make appealing lamp bases, the Jamie Young Company was born. In the 20 years since that fateful journey, Jamie Young Company has blossomed into a national leader in the lighting field, known for their beautiful designs, their use of unusual material, and their innovative lighting solutions.
