### **Maria Yee Provides an Oasis of Natural Beauty in the Midst of Bustling High Point Market**

High Point, NC, October 16, 2019 - An early pioneer of eco-friendly furniture design, Maria Yee, Inc. continues to introduce innovative, sustainable materials and finishes to their already expansive contemporary furniture collections. Their High Point showroom, located at 119 N. Wrenn Street, is a short two blocks due north of IHFC, but at Maria Yee, the abundance of natural materials and an open floor plan allow you to breathe in and truly engage with the furniture arrangements.

With a focus on wellness, material, and craft, Maria Yee strives to create an environment rich with all-natural and eco-conscious designs that enhance the aesthetics of any space and encourage a healthy lifestyle. The newest addition to the eco-friendly materials includes a collection of top-grain leather which is sourced responsibly from end to end of the supply chain. From responsible farming methods to an innovative, sustainable tannery which uses far less water than traditional methods and largely runs on solar power, this leather is of the highest quality both aesthetically and ethically.

Visit Maria Yee to see these beautiful, tactile materials up close and to experience the serenity created by the wide range of contemporary wood and bamboo furniture they have to offer.

#### **About Maria Yee, Inc.**

Maria Yee established her namesake design studio in 1988 in Scotts Valley, California. A design pioneer focused on California contemporary furniture, the studio focuses on wellness, material, and craft. Every element matters; from responsibly grown hardwoods, to eco conscious water-based finishes, to luxurious leather, to hand forged metal pulls, Maria Yee works hard to sustainably source quality materials. Maria Yee applies honed techniques, breathing new life into classic craftsmanship. Utilizing a modernized joinery system based on ancient Chinese tradition, Maria Yee has developed construction techniques that require no nails or screws. Acclaimed for California contemporary designs as well as advancing environmental and social responsibilities, Maria Yee believes in holistic design, and the idea that every step in the process material, craft, and environment matters.
