Opening of the largest logistic centre in the region

One of the biggest investment projects implemented by Grupa Meblowa Szynaka has just been completed in Hława - expansion of the Szynaka Logistic Centre in Hława. This project, which constitutes part of the company's dynamic development strategy, resulted in the construction of the largest facility of its kind in northern Poland and central Europe.

The project allowed us to create the largest and most modern logistic centre with the total floor area of over 8 ha, which corresponds to 10 football fields. The construction of the new hall with floor area of over 15,000 m² increased the total storage area of the logistic centre to nearly 60,000 m². The modern logistic complex features in total 12 storage halls with 9,000 running metres of high-storage racks (mainly 5- and 6-storey ones), in total nearly 19,000 pallet bays facilitating efficient and precise storage and access to goods. Over 50 modern loading ramps allow us to quickly load and offload over 100 vehicles per day. The completed investment project will contribute to creating at least 50 additional jobs for the local residents. This means that the total employment figures for the Szynaka Logistic Centre

will grow to nearly 400 people, and in the whole Grupa Meblowa Szynaka to nearly 3,500 members of staff.

- Implementation of such an ambitious project is our answer to the global needs of ever-changing economic and logistic processes in Poland. Thanks to its location in the geographical centre of Europe, at a meeting place of east-west and north-south transport routes, Poland has an opportunity which we want to use. This investment project will enable us to open up to the world even more and to promote the Polish logistics market on an international arena. The expansion of the Logistic Centre will help improve the dynamics and make the activities of Grupa Meblowa Szynaka even more efficient, as well as accelerate the development of our city, province and country. We are certain that this is not only a great success of our company, but also a great opportunity for the entire region and country, and that the implemented investment project will enable us to create new development prospects for many Polish companies. We believe that - says President Jan Szynaka. The new facility was officially opened on September 4th during the Furniture Manufacturers' Partnership Fair, organised for the 9th time by Grupa Meblowa Szynaka and partners.
