TECNOPOLIS BY PRESOTTO: A SMART WARDROBE

Utmost customisation, adaptability and functionality for furnishing systems with sliding doors

Colour combinations, refined **design** and smart **technology** are the leitmotifs of the TecnoPolis line by Presotto **dedicated to wardrobe systems with sliding doors**. The Presotto novelties in terms of **bedroom wardrobes** have been conceived to satisfy any aesthetic requirement. The common denominator is still **functionality**: the inside of the wardrobe offers many ways of keeping clothes tidy, ensuring **utmost customisation**. Stability, reliability and **tailor-made solutions** are some of the advantages guaranteed by this **modern and innovative collection** that also offers a **model with an integrated TV set**. In addition to this, all the TecnoPolis wardrobes stand on **aluminium frames** that ensure **quick assembly and disassembly** and **prevent the typical imbalances** of wardrobes on wooden bases, as well as isolating the structure of the wardrobe and its contents from damp floors. Lastly, the **practical removable bottom panel** simplifies cleaning and can also be used as a secret compartment.

TECNOPOLIS_SHAPE DOOR

The **Shape sliding door** is composed of **nine different panels that can be customised in three finishes**. The **alternation of colours and materials**, set off by the **different thicknesses of the various trapezium-shaped panels**, is the distinctive feature of this door which is available in matt lacquer, gloss lacquer and color wood with a **matching coloured edging** in one colour. The aesthetic impact is definitely **avant-gardist**.

TECNOPOLIS_STEP DOOR

A TecnoPolis wardrobe with the **Step door** which – by combining full and empty, concave and convex spaces - creates a **dynamic succession of volumes**. The **handle is derived from one of the door panels** that protrudes slightly to make it easy to grasp. TecnoPolis is shown here with **swing doors** in a harmonious combination of silky beige and tobacco oak colours.

PRESOTTO

TECNOPOLIS_DAMA_TV_DOOR

Slim, invisible, very technological, there has never been a smarter way of benefiting from the TV in the bedroom. The TecnoPolis wardrobe by Presotto with **Dama_TV_Doors** offers **32 inches** of pure fun that **slide along with the doors in HD**. Thanks to our consolidated partnership with the **prestigious Loewe brand**, the **TV is perfectly integrated in the projecting door** while the **cables**, thanks to an **innovative connection**, run inside it and are guided as the door slides by means of a **specific mechanism**. This way the inside of the wardrobe is left completely free to be accessorised at will. The **audio system consists in two acoustic diffusers** located on the top panel of the wardrobe and tilted towards the front to ensure **optimal acoustics**.

TECNOPOLIS_KALEIDOS DOOR

Modern panels with gloss bianco candido and grigio antracite coloured glass distinguish the wardrobe with **Kaleidos sliding doors** by Presotto (see wardrobe in the photo). A **combination of three different types of glass** creates a **tone-on-tone effect** with a sober and elegant result. Kaleidos is available in **many configurations** which, just like in a puzzle, by **combining different-coloured glass panels** or **changing their position**, offer the possibility of achieving exclusive and original end result.s. The Kaleidos sliding door offers **six customised glass panels** in two or more colours and a combination of gloss and matt glass panels.
