**Modular, circular and pretty spectacular**

With the Sumo Sofa series, Fatboy is unleashing its sustainable design philosophy for a circular future. Fatboy stands for sustainable, high-quality products, supported by smart updates that will continuously extend their lifespan. All parts of the Sumo Sofa are easy to repair or replace, so you can keep it looking like new. While its design is inspired by a collection of cushions, the modular Sumo Sofa is constructed cleverly. Choose the right elements and easily assemble a loveseat, a three-seater, or even a sofa of record-breaking length. And should you move to a new home (or just fancy a new sofa), changing it into a new Sumo Sofa set couldn't be easier. That's how Sumo Sofa is making comfort timeless – but always different.

**The sofa that wants to grow old with you**

The Sumo Sofa series has been thought-through in every detail - with the highest quality every step of the way. Thanks to its metal frame, it's very robust and its recycled-foam cushions will keep their shape for many years. The fabric easily takes a bit of rough and tumble in its stride. No worries about stains, the covers are washable. And if you fancy a different color, simply replace them. Sumo Sofa only wants one thing: to grow old with you. And should you ever want to break up, the whole sofa can be disassembled, with every part being recyclable.
