Enzo Berti

SOMBRERO

Sombrero is a collection of lamps that, in its original idea, resembles the typical Mexican hat. The magic touch of Enzo Berti, experienced designer with a special passion for our brand Torremato, turns an iconic object like the Sombrero into a combination where natural elements such as metal and wood, volumes and techniques find their perfect balance.

The proper cutting of the metal, allow this pendant to project rays of direct and indirect light, that enhances the ash wood grains while designing the surrounding space.

Sombrero designs spaces differently thanks to two diameters and various finishes that mix bleached ash wood to painted metal for stylish interior design options. Sinuous shapes, meticulous shapes, classic shades of color for a modern living: sombrero will easily become the silent protagonist of your indoor world.

Available in gloss finish for both white and grey and aged iron.
